
Sex Toys: Bringing Them In

A plus for your pleasure, solo or together

TO BEGIN

A plus for your pleasure, solo or together

Sex toys are tools for pleasure, common and nothing to be ashamed of — neither an admission of failure nor a 'replacement' for a partner. Well integrated, they enrich your intimate life, alone or together.

This guide helps you get past the awkwardness and explore them, at your pace and as you wish.

YOUR INTENTION

What attracts or holds you back about using a sex toy: _____

A tool for pleasure, not a replacement

A sex toy is neither 'dirty' nor a sign that your partner 'isn't enough': it's a tool, like an accessory that adds sensations. It complements, it doesn't replace.

Understanding this removes guilt and opens curiosity.

Example

Nia feared her partner would take it badly; by framing it as a shared 'plus', they made it a game for two.

Demystify

Which myth holds you back about sex toys?

A plus, not a lack

Write: 'A toy adds pleasure — it replaces no one.'

Takeaway — A sex toy is a tool for pleasure, not an admission of lack.

Awkwardness and myths

'It means he's not enough', 'it's degrading', 'it's not for me': these thoughts load shame onto a simple object of pleasure.

Reframing them makes curiosity light.

Example

'He'll feel useless' blocked Sarah; in fact, shared with humor, the topic brought them closer.

Spot the awkwardness

Note an awkward thought about toys · a fairer version.

Light curiosity

Write: 'Curiosity is nothing to be ashamed of.'

Takeaway — An object of pleasure is nothing to be ashamed of.

Your curiosity is legitimate

Wanting to explore new sensations is healthy and legitimate. You have the right to be curious about your pleasure, without justifying or asking permission.

Allowing yourself to explore means taking your pleasure seriously.

Example

By finally allowing herself to try, for herself, Fatou discovered sensations she hadn't suspected.

My curiosity

What would you like to explore or discover?

Allow myself

A permission to grant yourself on this: _____

Takeaway — Your curiosity about your pleasure is healthy and legitimate.

Solo, together, and safely

In practice: you can start alone to get comfortable, then (if you want) bring it in together with communication and consent — presenting it as a shared game, never a criticism. Mind hygiene and suitable products (safe materials, compatible lubricant).

Chosen together, without pressure, a toy becomes one more closeness.

Example

By choosing together, online, what tempted them, Léa and her partner turned awkwardness into play.

Bring it in

How to approach it (solo first, or together) gently? _____

Safety

Write: 'Hygiene and safe materials: I take care of it.'

Takeaway — Solo or together, with consent and hygiene: one more pleasure.
