TO BEGIN

Knowing yourself to enjoy more

Female masturbation is still surrounded by taboos, when it's healthy, normal and precious: it's the best way to discover what feels good. Knowing yourself better means living your sexuality better, alone or together.

This guide helps you allow yourself this pleasure, without shame, as a space of your own.

YOUR INTENTION

What holds you back or raises questions about solo pleasure: _____

Healthy, normal, and useful

Solo pleasure is neither 'abnormal' nor 'reserved for single people': it's a healthy, common practice, and an excellent way to know your body. What you discover alone, you can then share.

Knowing yourself gives you the keys to your own pleasure.

Example

Nia thought 'it isn't done' in a couple; understanding it also nourished her partnered life changed everything.

Demystify

Which belief kept you from solo pleasure?

A key, not a lack

Write: 'Knowing myself alone also nourishes my partnered life.'

Takeaway — Solo pleasure is healthy, normal, and a key to knowing yourself.

The shame that distances

'It's dirty', 'a woman doesn't do that', 'it's wrong': these thoughts load shame onto a perfectly natural pleasure and deprive you of a space of your own.

Reframing them returns this intimate territory.

Example

'If I do it, something's wrong' guilted Sarah, until she understood it was healthy.

Spot the shame

Note a shameful thought about solo pleasure · a fairer version.

My space

Write: 'My body is mine — I have the right to find pleasure in it.'

Takeaway — Your body is yours — you have the right to find pleasure in it.

A territory of your own

Solo pleasure is a space of freedom that belongs only to you: no partner needed, no justifying. It's a way of caring for yourself and inhabiting your body.

Allowing yourself this pleasure is allowing yourself to exist for yourself.

Example

By giving herself this time, without guilt, Fatou reconnected with a sensuality she'd set aside.

For me

What could this time for you bring (relaxation, knowledge, pleasure)?

Allow myself

A permission to grant yourself on this ground: _____

Takeaway — This pleasure is a territory of your own — no justifying needed.

Complement, not competitor

Solo pleasure doesn't 'replace' your partner: it complements your intimate life and can even enrich it, since what you learn about yourself you can pass on. No pressure, no 'normal' frequency: it's as you wish.

And if desire is absent or a source of distress, that's information to explore, without judging yourself.

Example

By sharing with her partner what she'd discovered alone, Léa enriched their intimacy rather than threatening it.

Pass on

Something discovered about yourself you could share (if you want): _____

No norm

Write: 'There is no normal frequency — it is as I wish.'

Takeaway — Solo pleasure complements your intimate life — it doesn't compete with it.
